

UL94 HB

SELF-CERTIFICATION OF INVISIBLE SOLAR PV MODULES

Dyaqua Srls hereby declares that Invisible Solar products, which are made of epoxy resins, have passed the test for the plastic flammability UL94.

According to the regulations UL94, the material is classified HB when a 3 mm thick specimen burns at a maximum speed of 76 mm per minute.

The 3 mm thick plastic specimen tested by Dyaqua, which has been mounted horizontally and hit by a Bunsen flame for 30 seconds in according with test instructions, is burnt with a speed of 8 mm per minute before to self-extinguish.
